

NOTICE TO ALL RESIDENTS

Often you may have seen unsightly paint splattered across our roads. This was caused when someone disposed of WET Latex paint with their garbage and when the truck's compactor squished the can, all the paint oozed out and leaked onto the road.

Per the Town of Ashland DPW, all Latex paint cans must be placed on the ground next to orange garbage bags – but not inside the bags. This is so that the Waste Management drivers can check to make sure the paint is DRY before putting the can into the truck. Wet paint will not be taken.

So please leave the lids off partially empty paint cans and let them dry out before disposing of them.

Thank you for your cooperation.
